EDUCATION

University of the East
Recto Manila

Bachelor of Science in Computer Science
June 2026

CREDENTIALS

Information Technology Specialist - Python
Certiport - October 2025

ASAIHL Winter 2025 International Conference -
Learn by Doing: Experiential Learning in International Education
Presenter | Ho Chi Minh City, Vietnam

EXPERIENCE

Full Stack Web Developer Intern
Codev Prime

- Full Stack Web Developer**
Developed a financial service web application for tracking transactions, loan records, and user account information with frontend, backend, and database integration.
- Quality Assurance and Unit Testing**
Performed QA and unit testing for the Pearl Pay application using RSpec, identifying bugs and validating application functionality and reliability.

AI Development and Training

Developed and trained AI-powered features including chatbot interaction, automated responses, intelligent assistance, adaptive feedback, user behavior detection, intelligent navigation, and real-time correction of student mathematical inputs. Implemented AI-generated hints and personalized guidance to improve user engagement, learning, and support.

Game Development

- Developed 2D platformer (jump) games using Godot Engine, implementing gameplay mechanics, player movement, and physics-based interactions
- Created simple 2D card games using PyCharm with Python, focusing on game logic, rules system, and user interaction

PROJECTS

Tugon : Artificial Intelligence Powered Tutor For General Mathematics
Bachelor's Thesis

- Full-Stack AI Tutoring System: Engineered a web platform featuring a Sequential Delivery engine that provides real-time AI interventions and step-by-step guidance for mathematical problem-solving.
- Generative AI Learning Tools: Developed an automated module that transforms lesson outlines into curriculum-aligned review materials and interactive practice activities.
- Adaptive Feedback Engine: Integrated an intelligent feedback system that identifies specific learner misconceptions in real-time to provide targeted corrective hints and "soft nudges."
- Dynamic Learning Interface: Designed specialized digital workspaces with real-time mathematical rendering and dashboards to track progress and identify persistent knowledge gaps.

Finsight AI : Intelligent Financial Management Workspace

- Developed a comprehensive web application for personal finance management and multi-category expense and income tracking.
- Built an integrated AI assistant that provides personalized financial advice, spending insights, and budgeting strategies by analyzing real-time user transaction data.
- Designed interactive data visualization dashboards to track spending trends and saving goals.

MUSEO: Interactive Philippine Art E-Museum Web-Based Cultural Platform

- Developed a web-based digital archive that showcases Philippine art across five categories including painting, music, dance, film, and architecture to increase accessibility to cultural heritage.
- Engineered an interactive interface featuring integrated multimedia content and categorized navigation, serving as a comprehensive educational resource for students and art enthusiasts.

SKILLS AND TECHNOLOGIES

- Languages:** Python, TypeScript, JavaScript, Ruby on Rails, Java, Php
- Frameworks & Libraries:** React, Tailwind CSS, TanStack, Recharts, Framer Motion
- Backend & Database:** Supabase, PostgreSQL, Drizzle ORM, Better Auth, XAMPP(Apache,MySQL)
- AI Integration:** OpenAI API, Google Gemini API, Prompt Engineering, Smile API
- Developer Tools:** Git, GitHub, VS Code, Vercel, Postman, Figma, PyCharm, CodePen
